GENERAL ELECTRIC COMPANY
Schenectady 5, N.Y.

FOR RELEASE AT 3 P.M., THURSDAY, JUNE 5, 1958

MODEL TOWERS of General Electric's extra high voltage line--which will carry power at a maximum of 750,000 volts--dwarf a 110,000-volt transmission line tower built to same scale. From the left are Julius H. Hagenguth, famed lightning expert and EHV project consultant; Lynn Wetherill, manager of engineering for the Power Transformer Department; and Pier A. Abetti, project manager. Experimental EHV line near Pittsfield, Mass., will attain super voltages never before used by man for transmission of electric power.
